

League of Digital Justice Self-Assessment Quiz

Which League Alter Ego Leads Your Security Practice?

A Self-Assessment Quiz for Security Practitioners

Based on The League of Digital Justice Framework

About This Quiz

This diagnostic helps you identify your dominant cognitive mode — the alter ego you naturally slip into under pressure.

There are no “good” or “bad” answers. Every mode is essential. The goal is **awareness**, not labeling.

Instructions

Score each statement from **1-5**:

Score	Meaning
1	Never true
2	Rarely true
3	Sometimes true
4	Often true

5	Always true
---	-------------

Answer based on your instinctive response, not what you think you *should* do.

Section 1 — The Storyteller Bard 🗣️

Narrative Intelligence & Translation

#	Statement	Score
1	I instinctively explain complex concepts using metaphor or story.	—
2	I adjust my communication style based on the emotional tone of the room.	—
3	I can sense when people are overwhelmed and simplify accordingly.	—
4	I often serve as the “translator” between technical and non-technical groups.	—
5	I think in arcs, stakes, and meaning — not just facts.	—

Total (Bard): __ / 25

Section 2 — The Compassionate Healer ❤️

Human-State Awareness & Emotional Safety

#	Statement	Score
1	I notice when people are stressed, burned out, or ashamed.	—
2	I instinctively protect people from blame or humiliation.	—
3	I believe emotional states are part of the security landscape.	—

4	I create environments where people feel safe reporting mistakes.	—
5	I think about how work conditions shape vulnerability.	—

Total (Healer): __ / 25

Section 3 — The Log Detective 🕵️

Forensic Curiosity & Pattern Recognition

#	Statement	Score
1	I notice anomalies others overlook.	—
2	I enjoy reconstructing timelines and understanding causality.	—
3	I trust my intuition when something “feels off.”	—
4	I’m energized by puzzles, patterns, and investigative work.	—
5	I’m patient with detail and persistent with ambiguity.	—

Total (Detective): __ / 25

Section 4 — The Guardian of Firewalls 🛡️

Boundary Discipline & Architectural Thinking

#	Statement	Score
1	I care deeply about secure defaults and strong boundaries.	—
2	I notice when exceptions accumulate or controls drift.	—

3	I think in terms of blast radius, containment, and resilience.	—
4	I prefer prevention over reaction.	—
5	I’m comfortable saying “no” when it protects the system.	—

Total (Guardian): __ / 25

Section 5 — The Strategic Oracle 🧙

Foresight, Trendlines & Weak Signals

#	Statement	Score
1	I naturally think in terms of trajectories and long-term risk.	—
2	I notice cultural or behavioral drift before others do.	—
3	I connect small signals into larger patterns.	—
4	I anticipate problems months before they surface.	—
5	I’m drawn to strategy, forecasting, and scenario planning.	—

Total (Oracle): __ / 25

Section 6 — The Trickster Hacker 🐱

Adversarial Creativity & Playful Testing

#	Statement	Score
1	I like to poke at systems “just to see what happens.”	—

2	I think like an attacker and enjoy creative problem-solving.	—
3	I use humor or mischief to reveal blind spots.	—
4	I'm comfortable breaking things safely to strengthen them.	—
5	I challenge assumptions and enjoy unconventional approaches.	—

Total (Trickster): ___ / 25

Score Summary

Alter Ego	Score
 Bard	___ / 25
 Healer	___ / 25
 Detective	___ / 25
 Guardian	___ / 25
 Oracle	___ / 25
 Trickster	___ / 25

Interpreting Your Results

Your highest score = Your dominant alter ego *This is the mode you instinctively reach for under pressure.*

Your second-highest score = Your supporting mode *This is your backup stance — where you go when your primary mode isn't working.*

Your lowest score = Your growth edge *This isn't a weakness — it's an opportunity to expand your range.*

If your scores are close (within 3 points):

You're a **natural integrator** — someone who rotates modes fluidly. This is the mark of experienced practitioners who have developed range over time.

Your challenge: *Ensure you're choosing modes deliberately, not defaulting to whatever feels easiest in the moment.*

If one score is much higher (5+ points above others):

That mode is your **instinctive stance** under pressure. You likely built your career identity around this strength.

Your challenge: *Recognize when this mode isn't serving the situation and practice rotating to others.*

If one score is much lower (5+ points below others):

This represents your **growth edge** — the mode least natural to you.

Consider: - **Low Bard**: Practice translating findings into stories before presentations. - **Low Healer**: Notice emotional states in post-incident reviews. - **Low Detective**: Spend time with logs without a specific goal. - **Low Guardian**: Review your own exception approvals quarterly. - **Low Oracle**: Track three-month trendlines on one metric. - **Low Trickster**: Run one "what if" experiment on a non-critical system.

The Goal Is Range, Not Balance

You don't need equal scores. You need the ability to **shift modes when the situation demands it**.

A Healer who can become a Guardian when boundaries are threatened. A Detective who can become a Bard when leadership needs the story. An Oracle who can become a Trickster when forecasts need validation.

You already contain the whole League.

The practice is learning to access all of it.

Next Steps

-
1. **Name your dominant mode** — Awareness is the first step.
 2. **Identify one growth edge** — Pick the lowest score.
 3. **Practice one rotation** — This week, deliberately shift into your growth-edge mode for 15 minutes.
 4. **Notice when you're stuck** — If something isn't working, try a different mode instead of pushing harder.
